## OBJECTIVE STATEMENT

---

Passionate about **solving complex problems** through **innovative thinking**, I am eager to contribute my technical skills, creativity, and dedication to a collaborative team while continuously learning and **delivering impactful solutions**.

## EDUCATION

---

**B.Tech in Artificial Intelligence and Data Science**

2023 - 2027

*Pursuing*

*Vivekananda Institute of Professional Studies, Delhi*

## EXPERIENCE

---

**Reputes Business Solutions**

Bangalore, India

*Web Development Intern - Remote*

*June 2025 - September 2025*

- Architected and deployed a **Shopify extension** that can integrate a **map** with a location of the stores
- Used **Remix framework** for the Frontend and used **GraphQL** Database to store the **user store data**
- led the team of 5** and published the extension to **Shopify Marketplace**

**Shaithilyog**

NYC, USA

*SDE Intern - Remote*

*March 2025 - June 2025*

- Developed and trained deep **Convolutional Neural Networks (CNNs)** for multiclass classification involving over 100 classes, achieving more than **90% accuracy**.
- Performed **large-scale** data refinement, preprocessing, and exploratory analysis to improve dataset quality and optimize model robustness.
- Collaborated with the backend team to **integrate** trained machine learning models into production systems, enabling seamless deployment and **real-time** inference.

**NexusKraft**

Bangalore, India

*Full Stack Development Intern - Remote*

*August 2024 - February 2025*

- Built and enhanced **user-facing features** using **React**, implementing reusable components and optimizing performance for a responsive, intuitive **user experience** across devices.
- Developed **RESTful APIs** with **Node.js** and **Express**, integrating with databases and third-party services to support dynamic data flow between the front end and back end.
- Collaborated in **Agile sprints** with developers and designers, participating in code reviews, daily stand-ups, and **version control with Git** to ensure high-quality, maintainable code delivery.

## PROJECTS

---

**Sorted | Next JS with Firebase**

2026

- Made an **SaaS** that enables users to manage their **browser tabs** in a simple **card based** system
- Made an **extension** to **facilitate communication** between our website and tabs.
- Used a **freemium model** with free **5 cards**
- Made seamless **payment infrastructure** using the **Dodo Payments API**

**MedCard | MERN Stack**

2025

- An IOT Based Solution that integrates the medical reports from various sources into a universal system
- Made a **IOT RFID Card** which when accessed shows data containing all the user medical history and medical conditions
- Created a responsive and **user-friendly UI** with **React**.
- Implemented **Mongo Database** for Storing various data types including files.

## TECHNICAL SKILLS

---

**Frontend:** React, React Native, Next JS

**Backend:** Python, Node.js, Express, SQL, MongoDB, Firebase

**Frameworks:** Material-UI, Bootstrap, Tailwind-CSS

**Language:** JavaScript (JS), TypeScript (TS), C++, Java

**Tools:** GitHub, Mongoose
